WORK EXPERIENCE

Full Stack Developer | Gilva S.A. | Oct 2025 – Apr 2026

Part-time contract | Hybrid mode (on-site and remote)

- Developed full stack solutions for custom enterprise management systems, covering both frontend and backend, including database management and technical support
- Led the technical team in both on-site and remote environments, managing task allocation, training new team members, and resolving incidents.
- Conducted requirements analysis and designed solutions tailored to client needs, focused on optimizing internal processes.

Full Stack Developer | Visual Technologies RPAS | Mar 2025 – Jun 2025

Internship contract | On-site mode

- Strengthened my full stack development skills by implementing custom software for document management and visualization.
- Developed skills in critical problem-solving and incident management throughout the project development lifecycle, improving my ability to respond to crisis situations.
- Collaborated with the team in both on-site and remote environments, participating in communication and coordination with employees during the project development.
